

Please look at the decision to preempt scheduled programming by Sinclair Broadcasting and replacing it with the political propaganda piece "Stolen Honor". This is so biased, and politically driven, that it is a great disservice to the public. The air waves are ruled to be property of the Public. Sinclair may use them free of charge - but only when it is for the public interest. Propaganda - and an obvious politically biased piece does nothing to serve the average person.

This is an obvious problem with big corporations controlling the airways. It affects the Public trust. Sinclair's actions make it obvious that the media ownership rules need to be strengthened and enforced. License renewal should require closer inspection. The public needs protection from corporation power. That is what the rules are for.

Thank you.
